

Is there a concrete medical supervised ML use case?

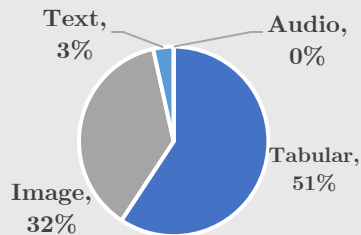

1

Top 3

- 1 SHAP
- 2 LIME
- 3 Intrinsic Interpretable

Which XAI method is used?

2

From which data type is the input?

3

Our estimation:
Only 16 %
of the XAI
methods

How many XAI methods
can potentially be
understood by patients?

4

On average,
2.15 out of 3
with a positive trend
to better descriptions

How well is the ML
pipeline described?

5

Is the source code
provided?

6

Is the data publicly
available?

7
